

## Leveraging: From Projects to Programmes

### Health care in Tanzania

7 May , 2007

Stijn van der Krogt

Team Leader Country Programmes

Jac Stienen

Managing Director

SDC meets BCO September 2007

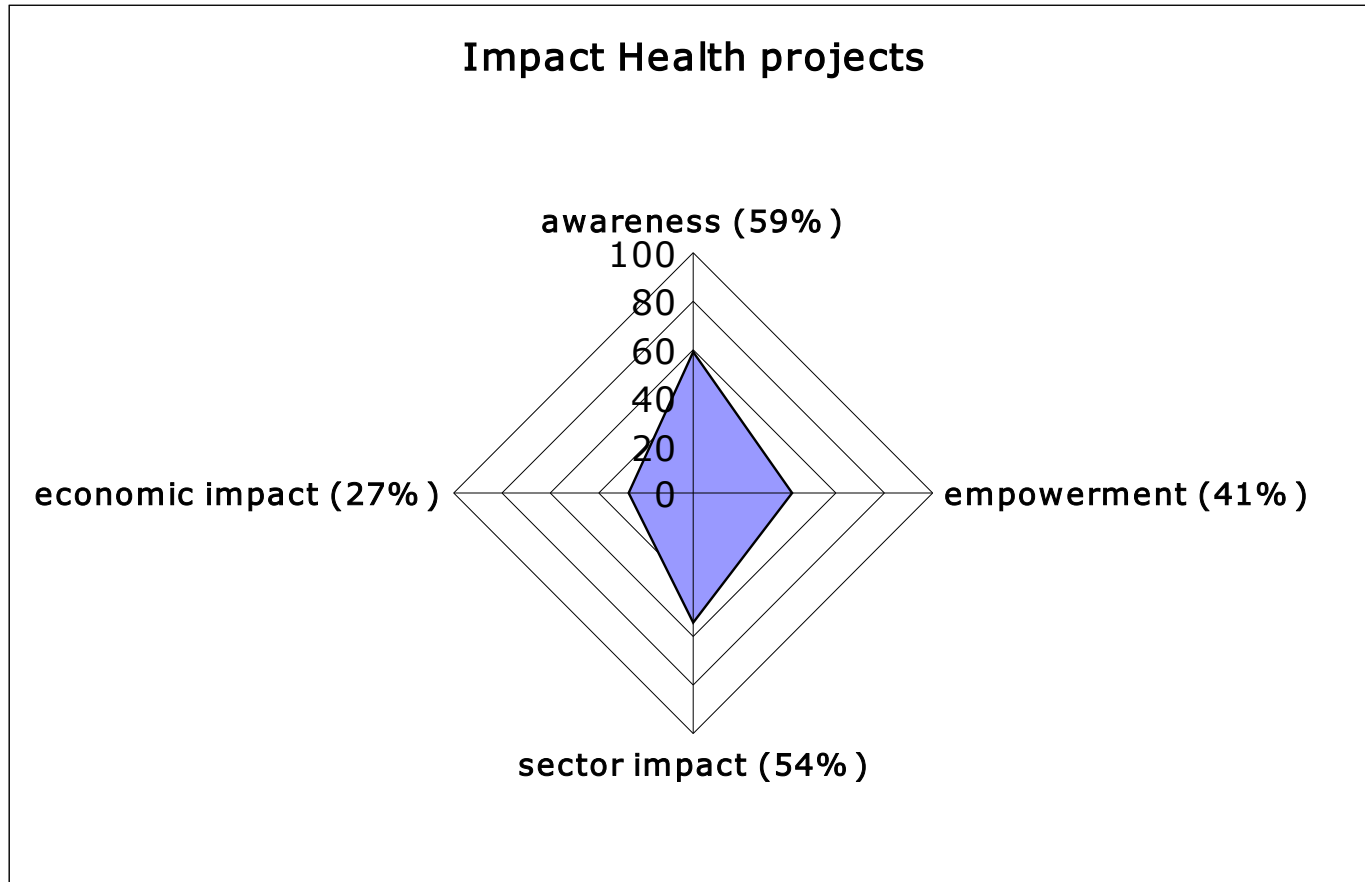

## Integrated approach to ICT4D

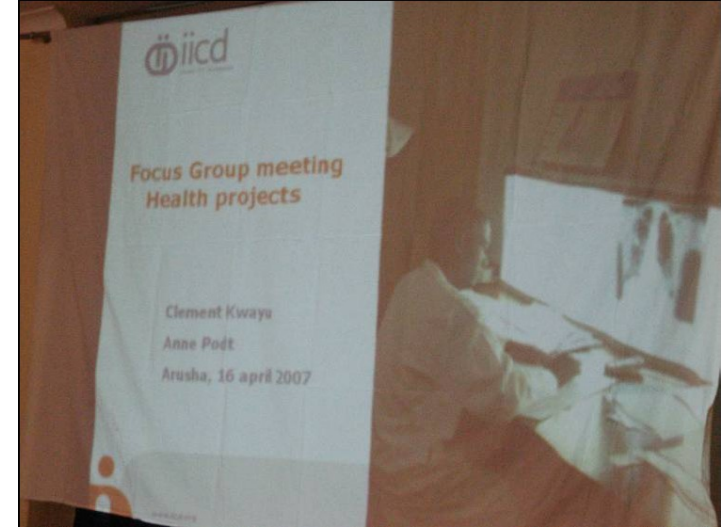

- Programmes in 9 countries in health, education, livelihoods and governance
- 120 projects have 250.000 trained and active users of information and ICT and 2.5 million beneficiaries
- 11 ICT sector and national policies supported
- Capacity development partners in 9 countries and more than 5,000 people trained
- National knowledge sharing and lobby networks in 9 countries
- International knowledge sharing: Over 50 publications, research and impact studies
- Monitoring and evaluation of satisfaction and impact of all projects

- Roundtable workshop identifies ICT for health priorities in the health sector
- Start pilot projects in priority areas
- Train cadre of trainers and consultants
- Develop software health care systems
- Develop connectivity models
- Foster knowledge sharing network
- Apply monitoring and evaluation system for learning and impact measurement

## Programme of pilot projects

- Health management information district level
- Health management information national level
- Hospital and patient management information
- Professional development - continuous medical education
- Delivery of health care services: telemedicine, diagnosis, preventive health information
- Dar es Salaam, Moshi, Mwanza areas

- Fast embedding in institutions needed
- Participatory and multi-stakeholder approach needed
- Involve decision makers
- Need for wide-spread training of users
- Ensure change management
- Ensure electricity solutions
- Budget for sufficient costs ICT, human resources

## Lessons learned on leveraging

- Start with pilot sites works
- Present pilots as a sector programme
- Ensure participation in SWAP working group
- Programmatic approach attracts development partners: SDC, CORDAID
- Work with other development partners to replicate pilots: GTZ
- Raise awareness and train Ministry of Health
